

AKDO®

BESPOKE CARPET

Custom Hand-Tufted & Axminster Carpets

For Hospitality, Commercial, and Residential Projects

Far Beyond the Surface

AKDO®

AKDO is a design-driven carpet partner, delivering custom hand-tufted and Axminster solutions for the world's most demanding hospitality and residential environments.

At AKDO, we design and craft exceptional carpet solutions that inspire enduring, meaningful spaces. More than thirty years ago, our CEO, Hakki Akbulak, and his brother—living an ocean apart—founded the company as a way to remain connected through shared purpose.

What began as a family endeavor has grown into a global enterprise rooted in craftsmanship, creativity, and precision, supported by skilled artisans and a dedication to quality at every step.

With fully integrated capabilities—from custom yarn development and dyeing to advanced tufting and Axminster weaving—AKDO maintains complete control over every stage of production, ensuring consistency, precision, and the ability to execute complex design intent at any scale.

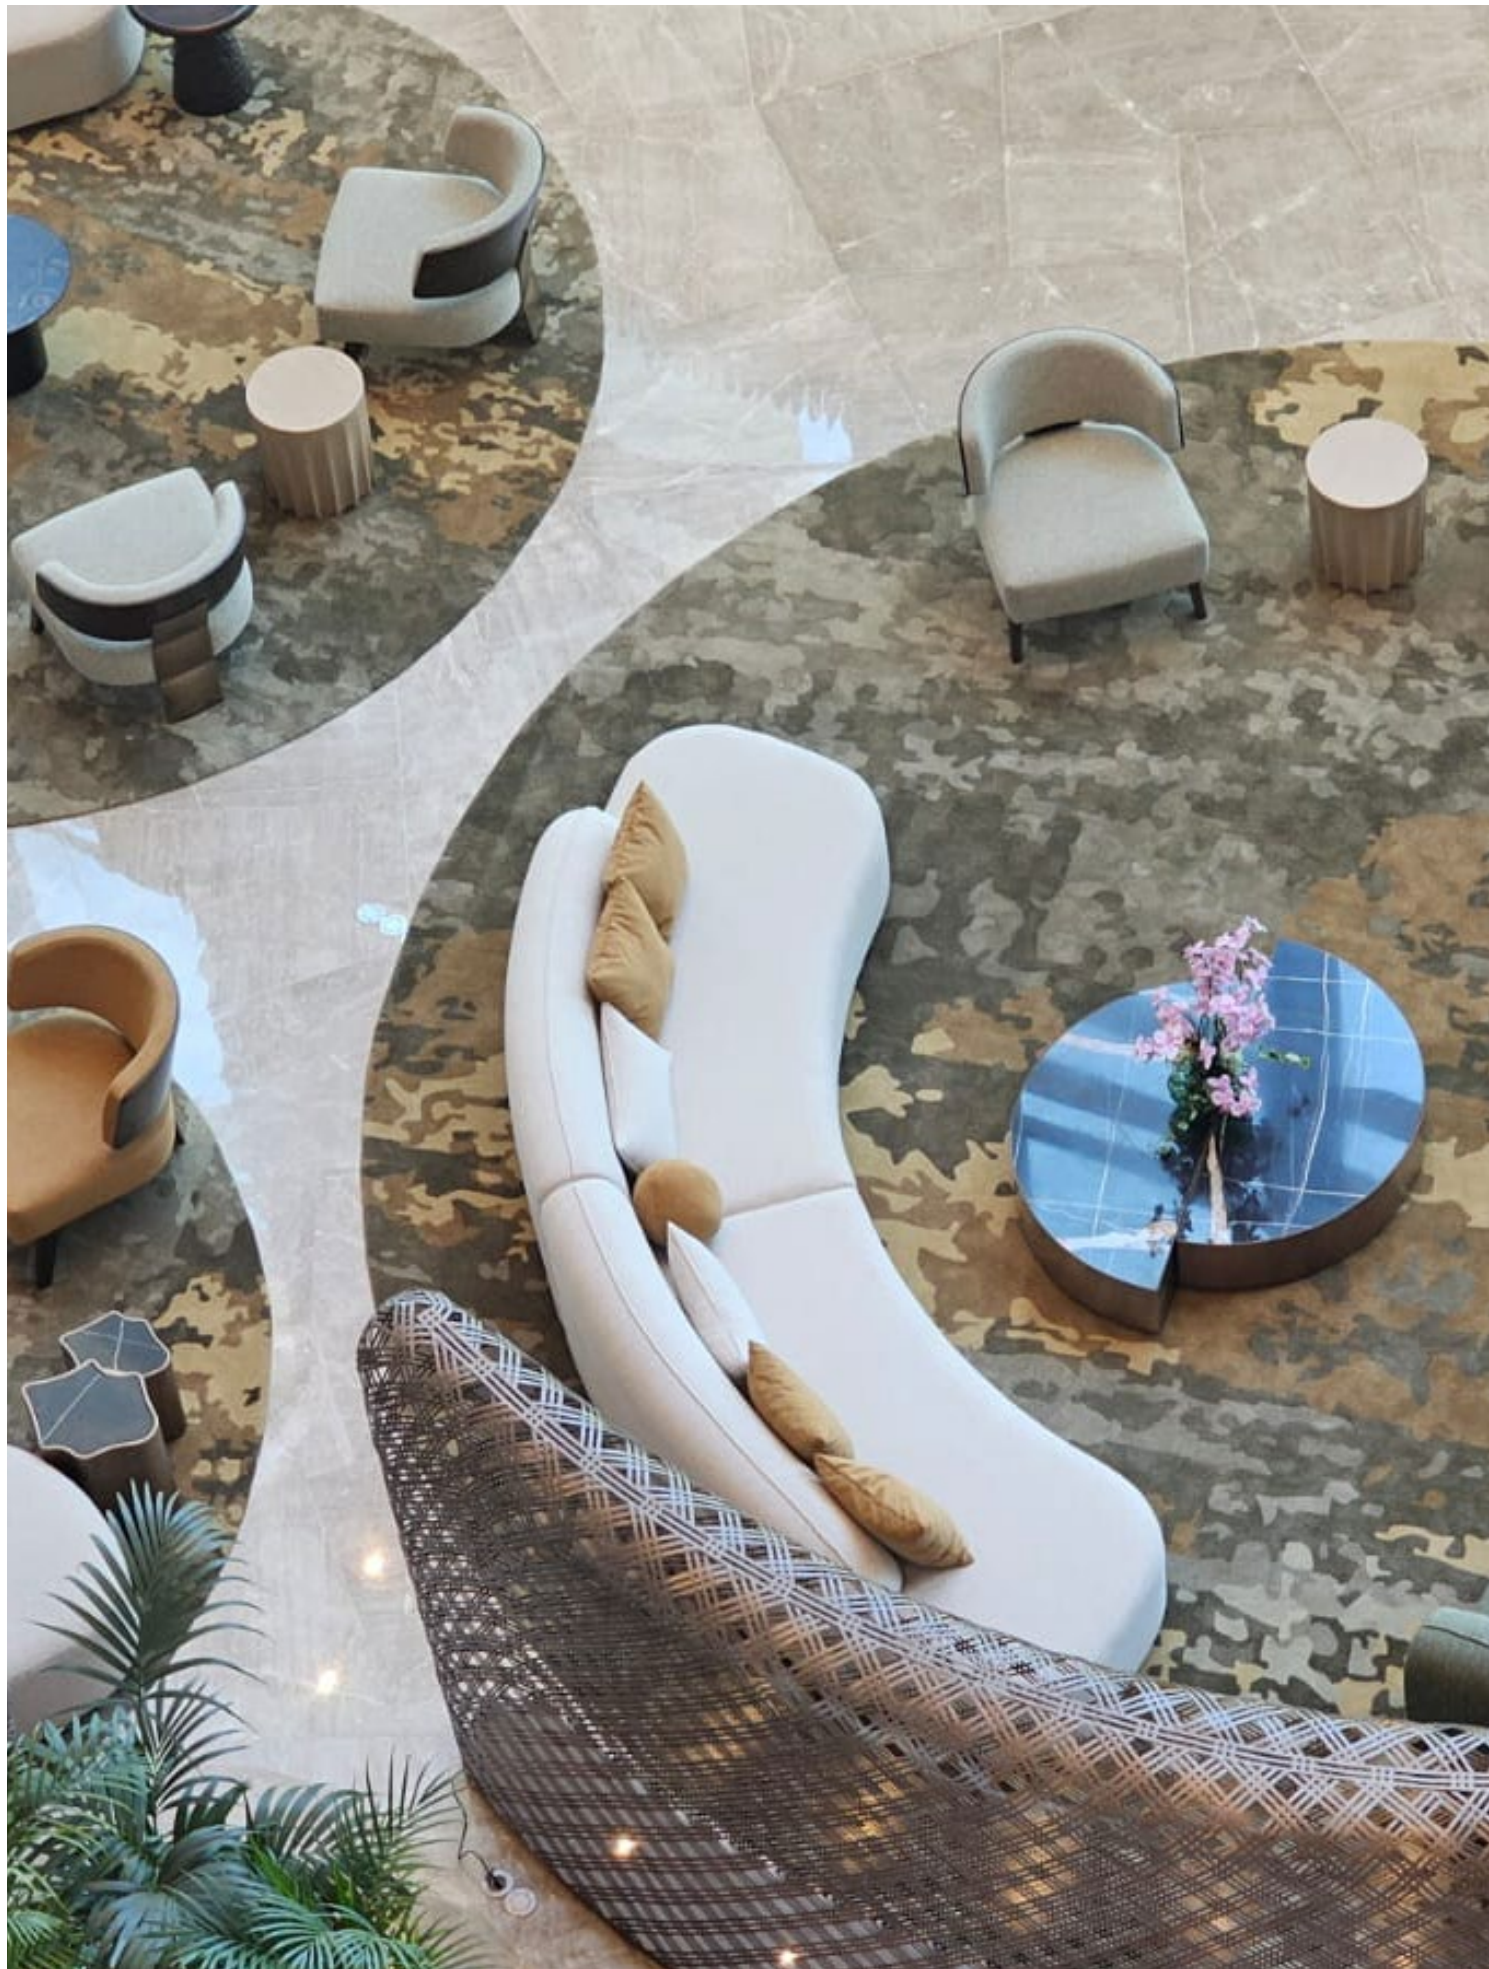

*We create beautiful
surfaces—but our purpose
runs deeper.*

CONTROL AT EVERY STEP

The AKDO Advantage

With fully integrated production, AKDO maintains complete control at every stage—from custom yarn development and precision dyeing to hand-tufted craftsmanship and advanced Axminster weaving—ensuring exceptional quality, consistency, and precision in every carpet.

THE AKDO ADVANTAGE

Fully Integrated Approach

Our fully integrated approach allows us to support every stage of a project—from concept through completion—with precision and care. Working alongside designers and architects, we provide tailored solutions that balance aesthetic vision, performance, and execution.

Crafted with Precision

Every AKDO carpet is crafted with a commitment to quality, guided by skilled artisans and supported by rigorous standards—ensuring consistency, reliability, and exceptional results.

CUSTOM PROCESS

From Concept to Completion

01 — Concept & Inspiration

- Artwork development
- Scale and layout refinement
- Material and color direction

02 — Design Translation

- CAD translation into production-ready files
- Construction planning and specification
- Axminster repeat development or tufting parameters

03 — Sampling & Dyeing

- Custom dyeing and strike-offs
- Texture and pile review
- Refinement of tone, scale, and finish

04 — Production & Delivery

- Manufacturing (hand-tufted or Axminster)
- Quality control at every stage
- Logistics and project coordination

A CURATED DESIGN EXPERIENCE

AKDO offers a highly curated showroom experience, anchored by our Connecticut location and our flagship space in New York's Flatiron District—the heart of the city's design community. Designed for discerning clients, our showrooms provide an immersive environment where materials, craftsmanship, and custom carpet design come together seamlessly.

Manhattan Showroom, NY

RESIDENTIAL

Using the finest materials—from wool and silk to advanced performance fibers—AKDO creates fully customized carpets defined by texture, pattern, and precision. Each piece is tailored to elevate interior spaces with a balance of artistry and technical expertise.

COMMERCIAL

From hospitality to retail, AKDO delivers high-performance carpet solutions designed to meet the demands of complex environments—balancing durability, design integrity, and seamless execution.

CARPET COLLECTIONS

These highly sophisticated, signature carpets are available for you to order as-is, or to serve as inspiration for a bespoke design of your own. These are distinctive designs, always beautifully considered—carpets that have earned AKDO a reputation for design leadership.

HAND-TUFTED

Hand-tufted carpets offer exceptional design flexibility, allowing for fully customized expressions in pattern, color, material, and texture. Crafted using advanced tufting techniques, each carpet is tailored to exact project specifications—balancing artistic freedom with efficiency and performance. From subtle, refined compositions to bold, highly detailed designs, hand-tufted carpets deliver versatility, durability, and comfort across residential and hospitality environments.

Construction Method

- Hand-tufted using manual or computer-assisted tufting guns
- Yarn is inserted into a primary backing fabric, then secured with high-performance latex
- Reinforced with a secondary backing for dimensional stability
- Suitable for both area rugs and wall-to-wall installations

Materials

- New Zealand wool (standard for durability and resilience)
- Polyamide for luster and softness
- Wool blends for performance optimization
- Nylon or performance fibers for enhanced durability in select applications

Pile & Construction Options

- Cut pile, loop pile, or combination constructions
- Variable pile heights for sculpted or dimensional effects
- High-density tufting for pattern clarity and wear resistance
- Custom gauge and stitch rates depending on design requirements

Finishing Techniques

- Hand carving and sculpting
- Tip-shearing for tonal variation
- Embossing and high-low texture definition
- Multi-material integration within a single design

Performance Characteristics

- Engineered for medium to heavy residential and hospitality use
- Excellent acoustic properties and underfoot comfort
- Colorfastness and fiber durability are aligned with project requirements
- Customizable backing systems based on installation conditions

Design Capability

- Unlimited pattern and color flexibility
- Suitable for organic, geometric, and large-scale custom artwork
- Ability to translate complex design intent into tactile surface expression

Typical Applications

- Guestrooms and suites
- Residential interiors
- Feature rugs and statement areas
- Select hospitality spaces requiring both comfort and design impact

Customization Approach

Each hand-tufted carpet is engineered specifically for the project to balance:

- Aesthetic intent
- Performance requirements
- Installation conditions

This tailored approach ensures every carpet meets the highest standards of both design and functionality.

BROADLOOM | AXMINSTER

Broadloom carpets—particularly our Axminster constructions—are designed for wall-to-wall installation and engineered for demanding commercial environments. They deliver intricate patterning, exceptional durability, and long-term performance across high-traffic interior spaces.

Construction Method

- Woven using advanced Axminster looms
- Fully integrated construction ensures pattern accuracy and structural integrity
- Produced in broadloom format for wall-to-wall installation

Performance Characteristics

- Designed for heavy commercial use
- Exceptional wear resistance and appearance retention
- Superior pattern definition over time
- Meets hospitality performance requirements (IMO / project-specific compliance)

Materials

- 80/20 wool nylon blend (industry standard) for durability and resilience
- 100% wool options available for select applications
- Performance-engineered yarn systems for heavy traffic environments

Design Capability

- Complex multi-color patterns with precise registration
- Large-scale repeats and seamless transitions
- Ideal for geometric, branded, and highly detailed designs

Construction Specifications

- From 7 rows to 11 rows
- Controlled pile height for durability and maintenance
- High-density weaving for pattern clarity and wear resistance
- Custom repeat sizes and layout coordination

Installation Advantages

- Broadloom format minimizes seams
- Suitable for corridors, ballrooms, and large public spaces
- Engineered for consistent alignment across large areas

Typical Applications

- Hotel corridors
- Ballrooms and event spaces
- Casinos and public areas
- High-traffic commercial interiors

YOUR PROJECT, CRAFTED BY AKDO

Every project begins with an idea—and at AKDO, we bring that vision to life with precision, craftsmanship, and care.

From concept through completion, we collaborate closely with designers and clients to create custom carpets tailored to each space, balancing performance and aesthetic intent.
