Epoxy grout should be used when installing Next mosaics with metal. A 1/16" grout joint is recommended for all Next mosaics.

*As a natural material, brass is prone to oxidation; a chemical reaction that occurs over time from exposure to air. Both stainless steel and brass may scratch when used as floor covering.

Due to the inherent characteristics of natural stone, terrazzo, and metal, there may be variations in color, movement, and texture from lot to lot. For detailed installation guidelines, visit akdo.com.

DISCLAIMER: The performance of surface covering products often depends on installation, environmental, and usage factors unique to each project. AKDO is not responsible for any effects that may be caused to products due to installation, wear from use, or exposure to environmental factors including but not limited to: hard water, chemicals, heat, flame, smoke, dirt or other substances. It is your responsibility to assess the project to determine if the product you are selecting is appropriate considering the unique characteristics of your installation, and to apply appropriate, high quality sealers when necessary. Please consult your installer for more information.
